

This is the first issue of a note to update Members on an alternate source of parts to those formally also supplied by Ralph Wren.

This update shows the parts additionally available from RRSL and we have retained Ralph's catalogue numbers in this list.

In the next few weeks there will be a second issue of the list to show parts formally supplied by Ralph that are also available from other suppliers of NEW Riley parts.

We are aware that Vanessa Wren plans to start offering Riley parts and we will update on progress on this front.
